**Subject: Recommendation 'Miss Collect project'**

Dear Sir/Madame,

Imtech N.V. is a European technical services provider in the fields of electrical engineering, ICT and mechanical engineering. Imtech, with approximately 22,500 employees, achieves an annual revenue of over 3.8 billion euro. Imtech shares are listed on the Euronext Stock Exchange Amsterdam, where Imtech is included in the Midkap Index. Imtech shares are also included in the Dow Jones STOXX 600 index.

Imtech provides customers with (measurable) added-value by offering high-value technical total solutions. Imtech stands out through its multidisciplinary approach - its virtually unique combination of electrical engineering, ICT (information and communication technology) and mechanical engineering across and throughout the full breadth and depth of the technological spectrum - from one contact point. Imtech covers the entire chain from consultancy and design to implementation, maintenance and management.

As a multinational we bear a significant responsibility for our Corporate Social Responsibility. By developing innovative technology, Imtech helps to solve social issues such as energy conservation, environmental improvement, use of wastewater and control of the particulate matter problem by improving mobility. Over the past years, Imtech has given extensive consideration internally to ways of building Corporate Social Responsibility into its conduct of business. One of the concrete projects set up is 'Shared Success for Developing Countries', where Imtech transfer knowledge to social entrepreneurs and by them to local communities in developing countries. Teams of Imtech employees carry out knowledge transfer projects over a period of six months. These projects run largely from the various Imtech countries and include a working visit of two or three weeks in the target country.

In 2008 the SSDC project supported World Mobile Plants initiative of Carlo Bakker in South-Africa with the development of the 'Miss Collect' project.

Imtech recommends the 'Miss Collect project' and supports the ideas behind it.

Please find attached our CSR Magazine 2009 in which we communicate about our CSR policy and 'Shared Success for Developing Countries' project.

Pieter Koenders
